

DIVAKAR KUMAR K

+91 9791621229 — divakar.akkd@gmail.com

SUMMARY

Enthusiastic AI fresher with a solid understanding of Machine Learning concepts and Programming. Seeking an opportunity to build impactful AI solutions in a collaborative environment.

TECHNICAL SKILLS

Generative AI: LLMs, Prompt Engineering, RAG

Languages & Frameworks: Python, SQL, LangChain, LangGraph

ML & Deep Learning: Linear models, Decision trees, Boosting frameworks, CNN, RNN, LSTM, Computer Vision

Tools: PowerBI, Kali Linux, Netlogo, Git, GitHub, ChatGPT, Claude AI

WORK EXPERIENCE

Cyber Security Intern

Larsen & Toubro Smart World & Communication

June 2022

- Assisted in monitoring systems and identifying potential security risks.
- Collected and organized information from multiple sources to support reporting and analysis.
- Created clear dashboards and reports to help teams make informed decisions.
- Worked collaboratively with team members to improve operational efficiency.
- Gained practical experience in a professional corporate environment.

Robotics Intern

Torus Robotics (iDEX-DIO)

July 2022

- Assisted in testing and improving robotic systems for reliable performance.
- Worked with engineers to ensure smooth operation and system stability.
- Supported robot movement testing and obstacle-handling activities.
- Participated in troubleshooting and validating system functionality.
- Strengthened teamwork, communication, and problem-solving skills through hands-on projects.

EDUCATION

University of Hertfordshire, Hatfield, Hertfordshire, United Kingdom

Sep 2024 – Sep 2025

Msc, Artificial Intelligence and Robotics

Sri Sai Ram Engineering College, Chennai, Anna University, TN, India

Aug 2020 – May 2024

B.Tech, Artificial Intelligence and Data Science

ACHIEVEMENTS

- Runner-Up – Smart India Hackathon:**

Contributed to the development of an innovative learning solution focused on improving student engagement and educational accessibility.

- NASA IASC Citizen Scientist:**

Successfully completed astronomy data analysis training and contributed to identifying celestial objects using telescope imagery.

- Participant – iDEX DISC 7 (SPRINT'22):**

Collaborated on the development of an unmanned surveillance solution designed for monitoring, object detection, and emergency support applications.

PROJECTS

- On-Device AI Medicine Identification and Augmented Reality Assistant**

Developed an AI-powered mobile healthcare application using Computer Vision, Deep Learning, and TensorFlow Lite for real-time medicine identification. Integrated Augmented Reality (AR), Voice Assistance, and Offline Processing to improve accessibility and ensure secure, reliable usage.

- Smart Library Management System**

Developed an AI-based Smart Library Management System with Facial Recognition, NFC Technology, and AR Navigation to automate library operations. Built a real-time web dashboard for book availability and enhance the overall user experience.
